Fall, 1911

---

**CUSTOMERS** are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named, we forward to the best of our judgment, without liability for error or delay.

**RESPONSIBILITY.**—After goods are placed on board cars here, we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

**ALL CLAIMS must be made upon receipt of goods.**

**TERMS CASH**, on or before delivery to express or railroad agents, unless by special arrangement.

**Two hundred and fifty**, twenty-five or five of any one variety will be furnished at the thousand, hundred and ten rates, respectively, but single plants of one or more varieties will not be sold at less than 15 cents each, except Vines and Herbaceous Plants, the minimum price of which will be 10 cents each.

**PACKING CHARGED EXTRA**, but only sufficient to cover cost of time and material consumed in the work.

**POST OFFICE ORDERS** payable at Dresher P. O., Montgomery Co., Pa.

**POSTAL TELEGRAPH OFFICE, DRESHER, PA. WESTERN UNION, AMBLER, PA.** Use Nurserymen's Telegraphic Code or "A B C" Code, 4th Edition.

**VISITORS** are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train taken stops at these stations.

**NOTICE.**—It is necessary that you should **TELEPHONE** us (Bell Phone, 226-A Ambler; Keystone Phone, Jenkintown 652-Y), in advance of your coming, so that we can send a carriage to the station for you. Our office is 2½ miles from either station.

---

## CERTIFICATE OF INSPECTION

Our nurseries are inspected several times each year, by inspectors of the Entomological Division of the Department of Agriculture of the State of Pennsylvania, and are free from insect pests and diseases. A certificate of the Department is attached to all shipments, and will also be furnished to customers if desired.

# Deciduous Trees

Several years ago we realized that there would shortly be a demand for a better grade of shade trees than were being commonly sold in nurseries at that time. With this idea in mind we commenced transplanting large blocks of all varieties, selecting only nice, straight, first-class trees for the purpose, discarding any crooked or ill-shaped stock. Time has proven the wisdom of our foresight, and while the demand for this class of stock has been greater than our expectation, our supply has been sufficient to meet the demand, and though our sales last year on these trees were very heavy, we still have a good supply on hand for this season's sales.

Our object is to grow a first-class tree, well rooted, with straight trunk and a nice top and we spare no expense to produce a tree of this character. All crooked trees are discarded. Every tree we send out is a good tree. We stake all of our trees with long bamboo poles and in that way we get not only a perfectly straight trunk, but a stem right to the top of the tree. This should be kept in mind when comparing our prices with the "cheap" trees usually offered.

**Notice.**—When ordering trees, be sure to specify both the height and calliper, as shown in the catalogue. It will be noticed that in many instances trees of the same height, are of different calliper and in others they are the same calliper but different height.

	Per 10	Per 100
<b>Acer campestre, English Cork Maple</b>

1¾ to 2 in. cal.....	12 50	125 00
2 to 2¼ in. cal.....	15 00	150 00
2¼ to 2½ in. cal.....	17 50	
2½ to 2¾ in. cal.....	22 50	
2¾ to 3 in. cal.....	25 00	
3 to 3½ in. cal.....	30 00	
3½ to 4 in. cal.....	35 00	
1¼ to 1½ in. cal. specimen.....	10 00	
1½ to 1¾ in. cal. specimen.....	15 00	
1¾ to 2 in. cal. specimen.....	17 50	
2 to 2¼ in. cal. specimen.....	20 00	
2¼ to 2½ in. cal. specimen.....	22 50	
2½ to 2¾ in. cal. specimen.....	25 00	
2¾ to 3 in. cal. specimen.....	30 00	
3 to 3½ in. cal. specimen.....	35 00	

These are all good straight, transplanted trees. The specimen trees have been grown wide apart in the rows, giving ample opportunity to develop well shaped heads.

**“ platanoïdes Reitenbachi, Purple-leaved Norway Maple**

1¼ to 1½ in. cal.....	10 00
1½ to 1¾ in. cal.....	13 50
1¾ to 2 in. cal.....	15 00
2½ to 3 in. cal.....	25 00

The Reitenbach Maple is a purple-leaved variety. The color is not as strong when the leaves first come out in the spring, but it develops later and retains the color better than the Schwedlerii during the summer months.

**“ platanoïdes Schwedlerii, Purple-leaved Norway Maple**

1½ to 1¾ in. cal.....	12 50
1¾ to 2 in. cal.....	15 00
2 to 2¼ in. cal.....	17 50
2¼ to 2½ in. cal.....	20 00
1½ to 1¾ in. cal. specimen.....	15 00
1¾ to 2 in. cal. specimen.....	20 00
2 to 2¼ in. cal. specimen.....	22 50
2¼ to 2½ in. cal. specimen.....	25 00

These are all very fine trees, transplanted and with perfectly straight trunks. The “specimens” are exceptionally fine with well developed heads.

**“ platanoïdes globosa, globe-headed Norway Maple**

3 to 4 ft. stems.....	12 50
-----------------------	-------

**“ pseudo-platanus, Sycamore Maple**

4 to 6 ft.....	1 75	15 00
----------------	------	-------

**“ pseudo-purpurea, Purple-leaved Sycamore Maple**

1¾ to 2 in. cal.....	12 50
2 to 2¼ in. cal.....	15 00
2¼ to 2½ in. cal.....	17 50
2½ to 2¾ in. cal.....	20 00
2¾ to 3 in. cal.....	22 50
3 to 3½ in. cal.....	25 00

This tree usually grows very crooked and with a very poor unshapely head. We transplanted and staked our trees so that they now have a perfectly straight trunk and regular and uniform heads.

**“ rubrum, Red or Scarlet Maple**

## Japanese Maples

Why buy cheap imported Japanese Maples, hide bound stock, poorly rooted, varieties badly mixed up and untrue to name when you can buy healthy American grown plants well rooted, vigorous and well-developed tops, guaranteed true to name and at a price very little higher than the imported stuff. All of our Japanese Maples are propagated in our nurseries and are guaranteed true to name.

## Magnolias

### Large Flowered Chinese Varieties

The following Magnolias have been several times transplanted. They are very bushy plants, branched to the ground. They will be dug with ball of earth and the ball sewed in burlap.

This Japanese Elm is a very beautiful variety. It makes a thick bushy head, small dark green leaves which remain on the tree until late in the Fall. It is one of the most ornamental trees and especially adapted where a small growing tree is required.

## Small Seedling Stock for Planting in Nursery Rows

We have upwards of a million of young seedlings and two year old rooted cuttings of Trees, Shrubs and Vines, suitable for setting in nursery rows.

Our stock consists of nearly every variety which we list in this catalogue, and is of the very best grade for nursery planting. A special catalogue of these plants will be issued about November 1st. File your request for a copy now and it will be mailed to you when issued.

We offer this stock for delivery only after January 1st, 1912.

# Deciduous Shrubs

We continually try to impress upon our customers the fact that the mere height of a shrub does not indicate its value, but that its "bushiness" must also be taken into consideration. Shrubs grown closely in nursery rows must necessarily make height, but the "bushiness" is sacrificed. A good, bushy, two to three-foot shrub is worth as much as a "slim" three to four-foot plant and for results it is worth more.

We grow our shrubs in wide rows and allow plenty of space between the plants in the rows to permit them to develop properly. It costs more to grow shrubs this way than where they are grown closely together, as we cannot plant as many on an acre. In comparing our prices with those of other growers, this fact should be given consideration.

18 to 24 in.....	1 25	10 00
<b>" Japonica variegata</b>		
18 in.....	1 25	10 00
<b>Laurus Benzoin (see Lindera)</b>		

	Per 10	Per 100
<b>Lespedeza bicolor</b>		
18 to 24 in.....	1 25	
2 to 3 ft.....	1 50	
<b>Ligustrum ibota, as commonly sold, not upright</b>		
18 to 24 in for hedging \$40.00 per 1000.....	75	5 00
2 to 2½ ft., light for hedging \$50.00 per 1000.....	85	6 00
18 to 24 in bushy \$60.00 per 1000.....	1 00	7 00
<b>2 to 3 ft bushy \$70.00 per 1000.....</b>	<b>1 25</b>	<b>8 00</b>
3 to 4 ft. bushy \$90.00 per 1000.....	1 35	10 00
4 to 5 ft bushy.....	1 50	12 00

The plants marked "bushy" are extra heavy transplanted plants. Those marked for hedging are also transplanted, but not as heavy as the bushy stock.

**" ovalifolium, California Privet**

18 to 24 in. \$18.00 per 1000.....	35	2 00
2 to 3 ft. \$25.00 per 1000.....	50	3 00
3 to 4 ft \$30.00 per 1000.....	75	3 50
18 to 24 in. heavy transplanted.....	75	5 00
2 to 3 ft. heavy transplanted.....	85	6 00
3 to 4 ft. heavy transplanted.....	1 00	7 00
4 to 5 ft. heavy transplanted.....	1 25	10 00
5 to 6 ft. heavy transplanted.....	1 50	

The "heavy transplanted" stock has been cut back and are extra bushy and heavily rooted.

**" Regelianum**

2 to 3 ft.....	1 25	10 00
3 to 4 ft.....	1 50	12 00

1 ft. clumps.....	6 50	50 00
15 to 20 in clumps.....	7 50	65 00

The *Rhododendron punctatum* is a dwarf growing variety, a native of the mountains of North Carolina and very hardy. Leaves are small, of dark green color and the plant grows in bushy compact form. Flowers in small clusters, beautiful light pink, almost covering the plant when in bloom. Our plants are nursery grown and are very bushy clumps. An excellent plant for setting on the outer edges of *Rhododendron* beds.

## Evergreens

### See also Evergreen Shrubs

We feel that we cannot say too much of our evergreens. We give particular care and attention to their culture, transplanting them as frequently as may be necessary in order to secure an abundance of fibrous roots. To this end they are transplanted every two years, and frequently sheared so that they have a good compact and shapely appearance.

All evergreens are dug with ball of earth and the ball sewed into burlap, the cost of which is included in the prices shown in the catalogue.

## Retinisporas

We have probably the largest and finest stock of Retinisporas, in all sizes, in the country. Plants from 1 foot to 11 feet. All sheared in good compact form and many times transplanted. Every plant is dug with a large ball of earth and the ball sewed in burlap. Even our smallest plants can be termed "a specimen plant." Considering the quality of our stock, the prices quoted are more than reasonable.

3 to 4 ft., with ball.....	30 00	

## Vines and Climbers

Our vines are all transplanted plants. We handle them just as we do shrubs, grow them for one year, then transplant them into regular nursery rows, give them plenty of room so that we may get a good bushy well-rooted plant.

Particular attention should be given to the pot grown vines which we offer, they are good bushy plants, grown one summer in five-inch pots or larger as may be required. Many planters prefer pot grown plants for setting out in the Fall, as they are less liable to "heave out" with the frost than field grown stock, and besides this these plants will produce a stronger and more vigorous growth next Summer than the field grown stock.

When shipping these plants we knock them out of the clay pots in which they are grown and put them in paper pots. In this way the plants are delivered to customer with the ball unbroken.

# Hardy Herbaceous Perennials Ornamental Grasses and Ferns

Here is a splendid assortment of the very choicest hardy perennials for hardy gardens, borders and formal gardens.

Not small, weak, microscopic specimens, but strong, well rooted plants, capable of producing good, quick results.

"Results the first season" is our aim always, and the general satisfaction our stock is giving is conclusive proof of its superiority.

July to September, etc., indicates the period of flowering.

	Per 10	Per 100

<i>Hibiscus Crimson Eye</i> .....	80	6 00

## Meehan's Mallow Marvels

This remarkable plant, introduced by us several years ago, has now become widely distributed throughout the United States and Canada. Even those who were at first skeptical as to the merits of the plant are now its most ardent admirers.

The Convention of the American Cemetery Superintendents was held in Philadelphia this year, and visited our nurseries in a body. Our Mallow Marvels were in full bloom and excited the admiration of all. The plant is hardy in all parts of the United States and Canada and thrives as well in one section of the country as in another. Individual blooms are as large as ten inches across and the plants commence to flower about mid-summer and continue throughout the balance of the season. We offer the stock in red, pink, and white flowering plants, but it must be kept in mind that there are various shades of the red and pink, but these shades are not separated.

## Red Star Brand Raffia

Why use inferior brands of RAFFIA when you can get the best brand for Nurserymen's use at about the same price?

RED STAR BRAND needs no recommendation. Nurserymen all over the country have been buying it from us for years and know its quality. We guarantee it to be as represented.

We are direct importers and keep a supply always on hand for immediate shipment. ORDER RED STAR BRAND from US. We have no substitutes.

## Tree and Shrub Seeds

This has been a part of our business for over 50 years. We issue a Special Catalogue of these seeds, which will be mailed upon application.

### Meehan's Mallow Marvels

**T**HIS plant has become so widely distributed since we introduced it several years ago that it seems unnecessary to discourse upon its merits at this time. It is a pedigree, being a cross between the southern scarlet Hibiscus and our native swamp Mallow.

It makes a vigorous growth—strong roots making a bushy clump five to seven feet in one season and blooming profusely from midsummer to frost. Being an herbaceous plant it dies to the ground in the fall, shooting from the root again the following spring.

The flowers measure from eight to twelve inches in diameter, and are sold in separate colors, in red, pink and white.

The plant is extremely hardy, having been tested and grown in all parts of the United States and Canada.

It grows naturally in moist ground but thrives equally as well in any good, rich soil. For prices, see page 41.
